

Spills Kits

Body Fluid Disposal & Containment System

For the safe and effective handling, containment, disinfection and disposal of infectious microorganisms contained in blood, vomit, urine, mucus, and on objects such as needles and syringes, broken glass and knives.

- Meets current Health & Safety requirements
- Contains and deodorises the spill
- Aids effective cleaning and disinfection of the soiled area
- Identifies all potentially contaminated material for suitable disposal
- Provides a secure unit for the safe storage of contaminated waste

The packs contain a sachet of granules to solidify the spill and a scoop and scraper to ensure the safe removal of the solidified spill.

A biohazard waste bag is also included and a 30ml response spray allows you to spray the contaminated area and disinfect it. As with the handling of any waste, care should be taken and as a precaution gloves and an apron should be worn during clean up

The CTA is able to supply the following Biohazard kits:-
